Good morning to all

This e mail is to inform all that yesterday 4/24/18 Sims was shredding cars and we were overrun with auto fluff and a horrible smell to the point my techs wanted to go home, there were balls of auto fluff rolling all around our yard and covering everything in the shop,

I did call and speak to Joe Caruso at 3:14 pm, Joe came to the shop and we walked the yard together, Joe asked would it be ok to have a crew come over and clean the yard on Saturday 4/28/18.

I wasn't able to take pictures and had planned to take pictures this morning, it's currently raining now and the auto fluff is matted into the asphalt. Joe Caruso sent a crew over this morning 4/25/18 to clean the yard.

This is going to continue all summer and will get worst as the prevailing winds come from the south

My GM was able to take a picture showing the air quality while Sims was shredding on 4/25/18 and I've attached the picture to this e mail.

This email is to inform all what we have to encounter every time Sims runs the shredder.

Thank you
